Teaching Assistants

Sheng-yu Wang

Zhiqiu Lin

Jun-Yan Zhu

- Computer Vision, Computer Graphics, Machine Learning, Computational Photography
- Love pets (cat & dog)
- Gaming (mostly FIFA these days)

Cat Paper Collection

As reported by Cisco, 90% of net traffic will be visual, and indeed, most of the visual data are cat photos and videos. Thus, understanding, modeling, and synthesizing our feline friends becomes a more and more critical research problem these days, especially for our cat lovers.

Cat Paper Collection is an academic paper collection that includes computer graphics, computer vision, and machine learning papers that produce experimental results related to **cats**. If you would like to add/remove an article, please send an email to **Jun-Yan Zhu** (junyanz at cs dot cmu dot edu). We thank all the authors for their contribution and support.

Zhiqiu Lin

- From Beijing, China
- Undergrad in CS&Maths at Cornell University
- Advised by Prof. Deva Ramanan
- Interested in visual recognition and continual learning

Sheng-Yu Wang

- Interested in generative modeling and model interpretation
- From Taiwan
- Undergrad in CS at Berkeley
- Play guitar for free time

Course preview

- A modern machine learning perspective
- Widely-used learning algorithms
- Interactive content creation tools

Logistics

Course objectives

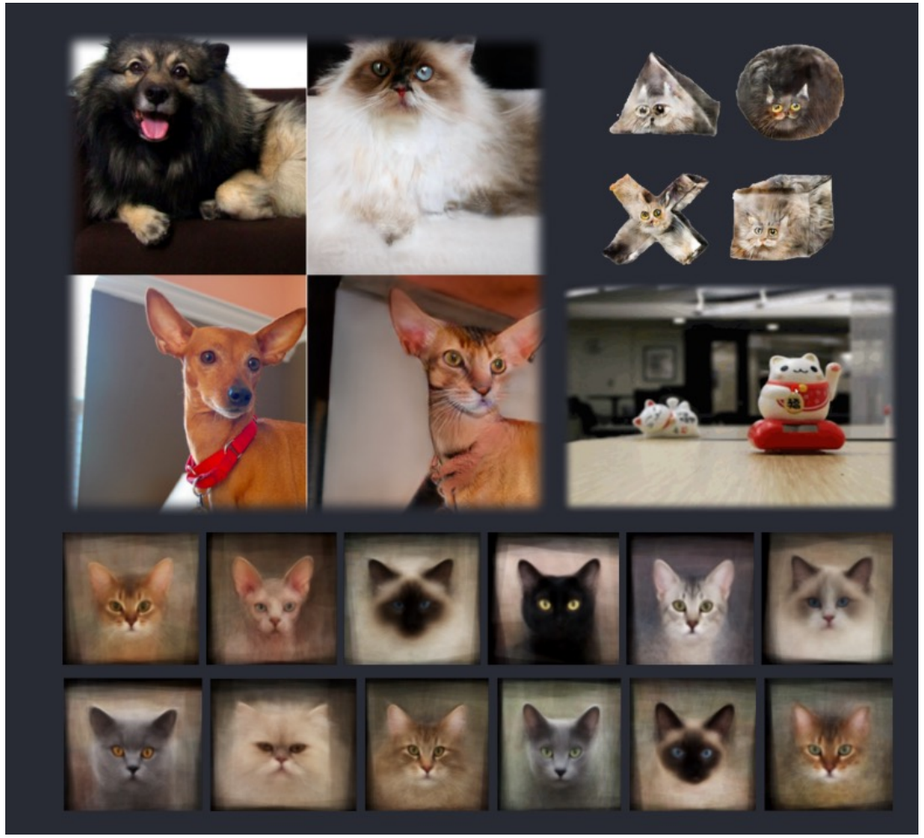
1. You will get a foundation in image editing and synthesis.
   - Texture synthesis and style transfer.
   - Face modeling and synthesis.
   - Image colorization and inpainting.
   - Video generation and editing.
   - Image-to-image translation.
   - Image and video editing. (warping, morphing, compositing)
   - Image and video forensics.

Course objectives

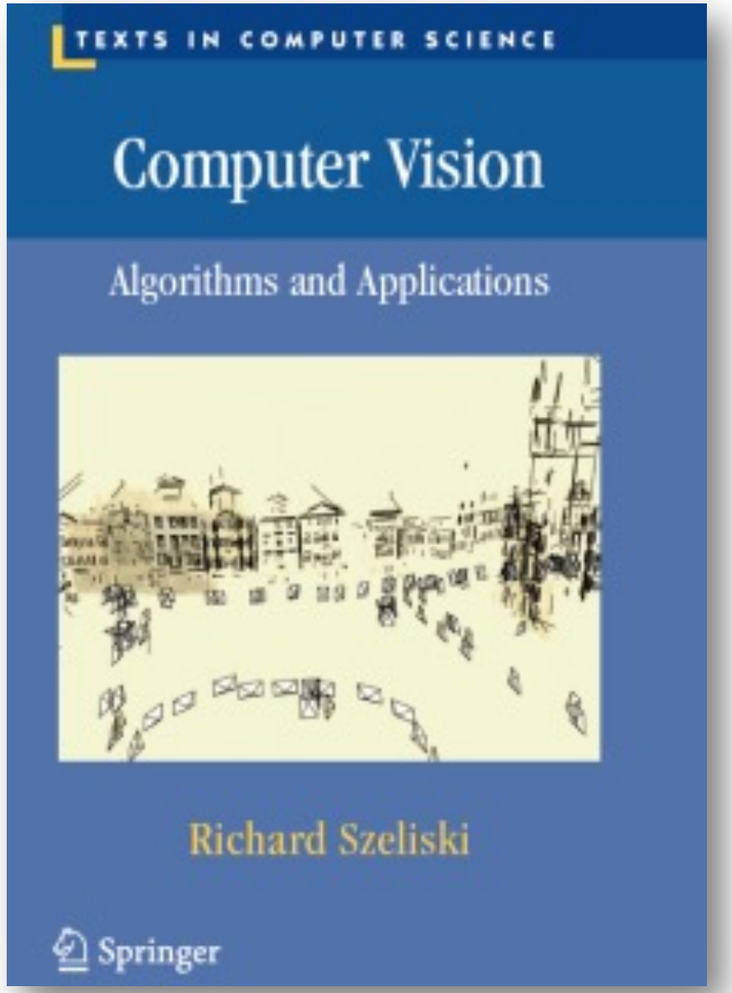
2. You will get a foundation of machine learning concepts
   - (fast) Nearest neighbor search.
   - Principal component analysis, Gaussian Mixture model. Markov Random Field (MRF)
   - Convolutional neural networks.
   - Deep generative models: Auto-encoder, Generative Adversarial Networks, Flow-based models, Variational Auto-encoder, PixelCNN, Energy-based models.
   - Conditional generative models.
   - Neural Radiance Fields (NeRF)

Course objectives

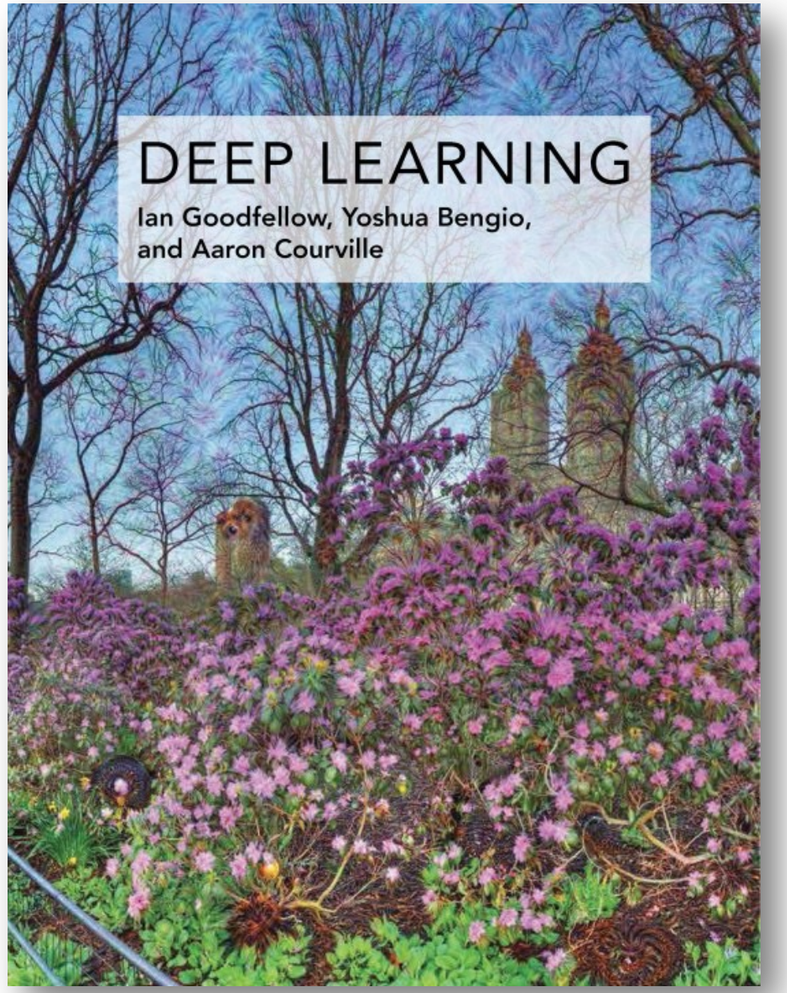
3. You will have some cool results with your own photos



Textbook



https://szeliski.org/Book/
(2021 edition")



https://www.deeplearningbook.org/
(2016 edition)

Grading

- Emphasis on programming projects (**65%**).
  - Classic: 1. image alignment. 2. image blending
  - Deep learning: 3. neural style transfer. 4. GANs and conditional GANs.
    5. reconstructing and editing an image with GANs.
- Late Policy for programming assignments.
  - Five (5) emergency late days for semester, to be spent wisely
  - 10% of penalty per day afterwards
- One paper presentation (**10%**):
  - 10-20 min, 1-2 people in a group.
  - Need to answer questions about this paper from now on.
- Final Project (**25%**)
  - A webpage-based report + a presentation.
  - No late day.
  - 2-3 people per group.

Assignments

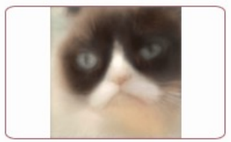
Assignment #0 - How to submit assignments?

Assignment #1 - Colorizing the Prokudin-Gorskii Photo Collection
Winner: [Konwoo Kim]
Honorable Mentions: [Juyong Kim] [Zihang Lai] [Manuel Rodriguez]

Assignment #2 - Gradient Domain Fusion
Winner: [Manuel Rodriguez]
Honorable Mentions: [George Cazanavette]

Assignment #3 - When Cats meet GANs
Winner: [Jun Luo]
Honorable Mentions: [George Cazanavette]

Assignment #4 - Neural Style Transfer
Winner: [Zihang Lai]
Honorable Mentions: [Zijie Li] [Tarang Shah]



Assignment #5 - GAN Photo Editing
Winner: [George Cazenavette]
Honorable Mentions: [Manuel Guevara] [Zijie Li] [Zhe Huang]

For each assignment

- Derive the math, implement stuff from scratch (+ starter code), and apply it to your own photos
- Every person does their own project (except final)
- Reporting via web page (+ submit code to Canvas)
- Afterwards, vote for class **favorite**(s)! **Gift**!
- Programming Language:
  - Python and PyTorch
  - you can use other languages, but you are on your own

Academic Integrity

- Can discuss projects, but don’t share code
- Don’t look up code or copy from a friend
- If you’re not sure if it’s allowed, ask
- Acknowledge any inspirations
- If you get stuck, come talk to us

Getting help outside of class

- Course Web Page
  - https://16726-image-synthesis.github.io/sp22/
- Discussion board:
  - Piazza.com
- Office hours (EST)
  - Zhiqiu: 2-3 pm Friday
  - Sheng-Yu: 2-3 pm Tuesday
  - Jun-Yan: 11 am-12 pm Monday

  Zoom links: see the Piazza post

Why you should NOT take this class

- Project-based class
  - No canned problem sets.
  - Not theory-heavy.
  - will read many research papers.
  - Open-ended by design.
- Need time to think, not just hack
  - **Creativity** is a class requirement.
- Not worth it if you don’t enjoy it.

Now… reasons TO take this class

- Not too many similar courses at other places.
- You get to create pictures and unleash your creative potential.
- Interested in grad school and research? ☺
- Interested in industry jobs? ☺

Thank You!
